Professional Summary

Software Engineering undergraduate with a strong interest in Quality Assurance (QA) and Web Development. Skilled in manual testing, automation testing, functional testing, black-box testing, test case design, defect reporting, and UML modeling through academic projects. Proficient in Python, Java, JavaScript, HTML, CSS, and Selenium. Seeking an opportunity to apply software testing and development skills while contributing to a QA or web development team.

Technical Skills

Programming Languages: Python, Java, JavaScript

Web Technologies: HTML, CSS

Testing Tools: Selenium, Postman, Quase.io

Testing Skills: Test case design, Functional testing, Black-box testing, BDD/Gherkin, EARS, Defect reporting

Software Engineering: SRS, UML modeling, Requirement analysis, Risk analysis, Documentation

Projects

Explainable AI Loan Approval System (FYP)

May 2026 – Present

- Developing a human-centered Explainable AI (XAI) framework for transparent and fair loan approval decisions.
- Building a full-stack system with Flutter, Node.js/Express, and Python machine learning services.
- Integrating SHAP and counterfactual explanations to improve interpretability and user understanding.

Utopia – Civic Engagement Platform

Jun 2025 – Dec 2025

- Co-authored the Software Requirements Specification (SRS) for a full-stack civic engagement platform for reporting and tracking civic and utility issues.
- Defined role-based access control (RBAC), report lifecycle states, and 21 functional requirements across citizen, officer, and administrator roles.
- Modeled use case, activity, sequence, class, and object diagrams to support implementation, validation, and test planning.
- Applied EARS and BDD/Gherkin scenarios to convert requirements into testable acceptance criteria.

Healthcare Management System

Aug 2024 – Dec 2024

- Contributed to the analysis and design of a healthcare management system focused on improving workflow efficiency and structured data handling.
- Supported requirement gathering, documentation, and system behavior modeling for core user processes.

Educational Qualifications

Sri Lanka Technology Campus (SLTC)

BSc (Hons) in Software Engineering

2023 – 2027

Padukka, Sri Lanka

Certifications

Simplilearn – Introduction to Software Testing

Mar 2025

Free Product Quality Management Course

May 2025

Soft Skills / Awards / Extracurricular Activities

Computer Society Student Branch Chapter of SLTC

2024 – 2025

Deputy Head, Membership Development Subcommittee

- Supported software development initiatives, technical coordination, and team-based execution.
- Contributed to event promotion, stakeholder communication, and collaborative planning for student-led technical activities.

Codemia v5.0, GitGenius 2025, and Arduino Challenge

Team Head

- Supported promotion efforts, coordination tasks, and hands-on event management for student-led technical events.
